

**Write a program which creates two threads, one thread displaying “BMS College of Engineering” once every ten seconds and another displaying “CSE” once every two seconds.**

```
public class ThreadDemo {  
    public static void main(String[] args) {  
  
        Thread t1 = new Thread(() -> {  
            try {  
                while (true) {  
                    System.out.println("BMS College of Engineering");  
                    Thread.sleep(10000);  
                }  
            } catch (InterruptedException e) {  
                e.printStackTrace();  
            }  
        });  
  
        Thread t2 = new Thread(() -> {  
            try {  
                while (true) {  
                    System.out.println("CSE");  
                    Thread.sleep(2000);  
                }  
            } catch (InterruptedException e) {  
                e.printStackTrace();  
            }  
        });  
    }  
}
```

## **OUTPUT:**
